# Ownership Benefits.

## Invest in your property.

## Why it makes sense.

### Great Value.

97 Street Condo units are priced to sell. Take advantage of buying hard to find small bay units.

### Unparalleled Location and Access.

By being in close proximity to the Whitemud, Calgary Trail and Gateway, nobody will complain about coming to your space.

### Competitive Financing Solutions Available.

Take advantage of creative financing solutions from KV Capital.

### Build Equity.

Why lease when you can build equity for your retirement.  
Invest in your bank account not the landlord's.

### Control Your Destiny.

Owning means no more landlord favoured lease agreements, no more operating costs reconciliations, no more rental rate hikes.

# How will owner-occupied financing help you achieve your goals?

## Access Higher Leverage

With up to 100% financing, you could potentially preserve working capital to be deployed in your business for other assets such as equipment purchases.

## Reduce Monthly Payments

With the right rate secured you can leverage longer amortization periods with repayment of your mortgage spread out over a longer period of time, which could lower payments each month.

## Tap Into Flexible Conditions

Owner-occupied financing potentially offers a variety of customizable conditions for your unique needs such as principle postponement periods and options for the completion of tenant improvement work.

## Build Equity

Contribute your monthly principal payments as a long term investment and increase the potential for your business' future growth opportunities.

## Owner-occupied financing.

Capitalize on both the stability and flexibility your business needs to thrive.

### What is owner-occupied financing?

In contrast to many commercial real estate transactions where a property is purchased with the intention of generating rental or investment income, owner-occupied financing is a beneficial capital solution to consider if your business owns the office space or building that you operate out of.

The primary advantage of owner-occupied financing is that you tend to receive more favourable financing terms and conditions including lower down payment requirements and less stringent reporting criteria.

### Is owner-occupied financing right for you?

If your business has been in operation for at least 24 months, you will be eligible for a variety of owner-occupied financing options. If your business is new, we can provide guidance and advice for the best financing model for you.
